iso file ok um... i got the following options something else either a 10mb partition or a 131mb partition i dont know what the options should be and i dont know how to save the partition i keep getting stuck at the bottom of the screen i have changed settings to the hd, i have changed the partition table to msdos, i have changed the "Bootable flag" to "Undefined" i have tried different settings this is the last thing i can do before the error message "Press any key to reboot" comes on screen i can go back to the initial partition scheme. but i want to partition one of my 2 drives to be a bootloader instead how can i do that help i am so confused what's going on !patience | wiz_of_damned, wiz_of_damned.; Don't feel ignored and repeat your question quickly; if nobody knows your answer, nobody will answer you. While you wait, try searching or or I'm trying to get some files off of a CD-RW. The disc is encrypted with a password that I know. alright i apologize wiz_of_damned: just set the partition type to fat32 and see if the installer will work By the way, what are
