Hi, I'm Maciej, and I'd like to share my story with you. For the last couple of months, I have been creating, printing and selling 3D printed Lego Mindstorms EV3 Education Set and sets in different colors and shapes. I created this page to share all the details, my prints and this experience with you. It was a very inspiring project, and I hope you find the same when you're looking for a 3D printed Lego Mindstorms EV3 Education Set. The first two models on this page were prints, which are available in 20 different colors. The last one is a real object, which is currently in my hands. This is the first model I printed, and it looks like it was the easiest one to print. Since then I have printed many more sets, with different printing settings and volumes. I really hope you enjoy them as much as I enjoyed making them. I created this page,
