WinFavs is a Windows application, which allows you to easily create and switch between several Favorites folders that can be attached to the Windows Start menu. These Favorites folders can also be easily renamed, so you can easily identify them. WinFavs stores all the custom Favorites folders in one profile, which means you will have to use the same one, from time to time. WinFavs can be downloaded for free from the Windows Store. WinFavs is an easy-to-use, cross-platform app, which helps you create and switch between custom Favorites folders for your favorite folders, websites and files. The Windows Start menu has been in existence for quite a while now, but it has limitations for the users who are not very familiar with it. For example, browsing

---

through the Favorites folders within the Start menu is not always a very simple task, as most of the time, the folders are not clearly visible, so you can access the folders quickly. Luckily, WinFavs comes in handy, as it is the app, which allows you to create as many Favorites folders as you want, in addition to showing them on the Windows Start menu. Furthermore, you can customize each folder's name, which can help you keep track of all of them, while also allowing you to explore all of them at the same time. What's more, you can even create custom Favorites folders for each website or file, so you do not have to select a single one. With this app, you can switch among the Favorites folders you want to use, just by tapping on the left icon. You can add the folders you want to have within reach, by either browsing to their location or simply dragging and dropping them onto the dedicated window. Moreover, you can rename each

---

folder to easily identify the one you are looking for, when working on school assignments, playing games or watching videos. Additionally, you can save the current configuration on your PC, in case something goes wrong, you want to restore it later on. WinFavs Features: Create multiple profiles for your favorite folders The graphic interface is highly intuitive and you can easily make out its functions - first and foremost, you need to create a new preset where you can later add the directories you select. You get to assign a relevant name to each profile, so you can easily identify the one you need, when working on school assignments, playing games or
