Is there a way I can do this with a switch port instead of a hub? A: Yes, you will need to have at least 3 "devices" (switches, hubs, routers,...) which can be connected to the switch, but each of these devices can only be configured with one IP address. Without a little more detail I will have to assume that you are asking about how to connect 3 physical servers to the same switch with 1 cable. You will need to have the servers configured with 3 different IP addresses on the network, and make sure that each server's IP addresses are in different subnets, which are also different from each other. In other words, if the subnet of one of the IP addresses is a /24, then the other subnets need to be /25 and /26. Yes, there is a way to combine all the seats in your home, but it will require a bit of a retrofit. We have everything you need to do this! The following video tutorial shows how to convert your dining room or living room into a one-seat kitchen: First, take a look at the space you will be working with. It will likely have two main aspects: the table and a wall or wall unit (a shelving unit with a door). Gather all of the materials needed to complete the project. The best part about this project is that you will be getting a sink, microwave and a
