Semiconductor memory devices are memory devices which are integrated in a semiconductor substrate and are classified into volatile memory devices and nonvolatile memory devices. The nonvolatile memory devices retain data even when power is not supplied. Examples of the nonvolatile memory devices include read only memory (ROM), programmable ROM (PROM), erasable programmable ROM (EPROM), electrically erasable programmable ROM (EEPROM) and flash memory. Flash memory devices are memory devices that allow memory cell programming and erasing operations. A flash memory device may be used as a storage medium for a variety of electronic devices, including a digital camera, a cellular phone, a personal digital assistant (PDA), an MP3 player, a personal computer (PC), a tablet PC and the like. Memory cells constituting a flash memory device may be classified into a NOR type and a NAND type. A NOR type memory cell may be configured to include a cell transistor connected to word lines and a selection transistor connected to a source line, whereas a NAND type memory cell may be configured to include a plurality of cell transistors connected in series between two selection transistors. A flash memory device having such memory cells may be configured to store data in high density.Editorial Medio Tiempo Reporte: Los del Bido El juego de la Liga de Ascenso se corrió la semana pasada en Monterrey. En el partido ganador por 3-1 al lesionado Cobresal, el apodado Bido nos reveló que en la victoria "tuvimos cuatro torneos, dos de lesión, uno de dolor y uno de enfermedad".

"Muchos de los niños sólo iban a jugar a que se les aviente el brazo, el labio, la niña que iba al centro no podía pegar un tanto, que era el equipo de bajo

He was living with his dad, James, and Jessie, in a slightly squished town called Heimtropolis. One day Mason, along with his dad, Jessie, and her son, Blake, found what they believed to be a bomb in a locked room. They called the police, and Mason was arrested as a suspect in the bombing. James and Jessie decided to take the blame for Mason, and while they were in police custody, Mason managed to escape. He went on the run, and spent some time hunting down his family, as well as the people who betrayed him. Mason returned to his dad's home and was told that he had been released from jail and that James was now back in his life. Mason wanted to leave the house, but was stopped by a thug named Bob, who wanted a favor from him. Blake went to a costume shop to get a costume so he can enter the World Championships, where he meets a lot of villains and old friends from the old days, including his dad. When Blake meets up with his family again, Mason says he's not leaving unless he gets what he wants, and does not return to his family or his old life, at least not yet. When Blake and his dad meet up with Cobra Commander, who has entered the World Championships in order to find Blake, they decide to enter as well. They then battle between the Avengers and the Iron-Man Brigade for the first place prize. After the battle, Mason

and Bob leave the World Championships and then begin on a new plot to have the Iron-Man Brigade kidnapped and held prisoner until they can be forced to give up Blake to Cobra. They set off to a location called Fairyland, where Cobras are in power. Blake then goes to Fairyland, along with his family, and is shocked to see his dad, Jessie and Bob, going to do something against him. Bob reveals that he set up the kidnapping with Mason and the Cobras. Mason then comes to the rescue and he and
