There are some dongles for specific software and lots of software support a.Q: How to create dynamic legend in ggplot2? I am trying to create some plots that contain some legends that will be dynamic. I have a function that generates a legend column with the categories based on a variable. I would like to be able to reuse the legend produced by the function to plot all my graphs. Here is the legend code: ForEach(s,function(x){i=x;i=gsub("[^0-9]", "", i) i=gsub("^0+", "", i) i=gsub("(\\.|\\-|\\.)", "", i) i=gsub("[^0-9].*", "", i) i=gsub("(0:1)", "0.01", i) i=gsub("0*", "0.00", i)

i=gsub("(\\.\.\.\.\\.)", f30f4ceada
