# Crypto Obfuscator For .Net Crack [Win/Mac]

[Download](#)

CRYPTO OBFUSCATOR FOR.NET (COPY PROTECTOR) Crypto Obfuscator For.Net is a reliable application designed to provide you with the proper means to protect the integrity of your code, by using various techniques to deter competition from learning how your.Net assemblies function. The program is quite complex, supporting a large array of input projects, including XBAP, WSP, Visual Studio, ClickOnce, Silverlight, WPF, SQL CLR, Mono, ASP.Net, WinRT / Metro, Unity 3D, and several others. Crypto Obfuscator For.Net is able to merge multiple related assemblies into a single one, encrypting and compressing them in order to ensure a highlevel of protection as well as decrease the total size of

the package. It can even perform a series of optimization operations at code-level, which can potentially enhance your product's general performance. This piece of software is meant to help you prevent your code from being hacked or cracked by ill-intended people, in the attempt to discover its details, structure, loops, method calls and other elements that make it function, or its vulnerabilities in order to attack your product, and by extension, you. Crypto Obfuscator For.Net can change the name of your classes, fields, properties, parameters, methods, etc. to other strings, so as to throw off anyone looking through it and make them unable to distinguish the original names, thus preventing them from discovering an object's true function. Additionally it uses encryption and virtualization to hide your code even

when run through a decompiling tool. Other features include 'Advanced Overload Renaming', 'Fake Renaming Scheme', 'Method Call Hiding', 'Advanced Tamper Detection', 'String Encryption', 'Control Flow Obfuscation', 'Code Pattern Masking', 'Watermarking' and several more, all working together to ensure the best protection level for your software in case it is confronted with a potentially threatening situation. To summarize, Crypto Obfuscator For.Net can prove to be a handy utility that helps you protect your intellectual property rights by allowing you to take proactive measures against anyone wishing to steal your code. Crypto Obfuscator For.Net Features: ★.NET ★ASP.NET ★WPF ★WCF ★XBAP ★Native Apps ★Silverlight ★Xamarin ★Phone Apps ★Native Mobile

Crypto Obfuscator For.Net is an advanced, reliable and efficient application designed to provide you with the proper means to protect the integrity of your code, by using various techniques to deter competition from learning how your.Net assemblies function. The program is quite complex, supporting a large array of input projects, including XBAP, WSP, Visual Studio, ClickOnce, Silverlight, WPF, SQL CLR, Mono, ASP.Net, WinRT / Metro, Unity 3D, and several others.
