A video player features a simple and user-friendly interface as well as a neat collection of functions, such as timeline, audio controls, playback speed, language, subtitles, as well as a bookmark option and a series of playlist features. Audio Player Description: The audio player application is very similar to the video one, but has no timeline, making it suitable for playlists and albums. In addition, it comes with a bunch of useful tools, such as repeating the last song or playing in a loop. The playback speed can be tweaked as well, while the ability to record can be used for later playback. Radio Player Description: The radio player provides a straightforward interface and handful of tools. The small details we like are the ability to create a playlist and not to worry about recording, thanks to the lossless quality of the file format. RealPlayer Description: This is a nice application that features a clean and user-friendly user interface, a neat media library, language and subtitle options, as well as a search function. VLC Media Player Description: This media player operates very similarly to the ones already mentioned, though it is certainly cleaner and more functional than the others. It features a straightforward interface, as well as the ability to save settings, create playlists and capture screenshots. Some of its more advanced features are the ability to crop and adjust video and audio streams, as well as import audio from MIDI, WAV, MOD, OGG and MP3 formats. Pan Tuned Radio Description: This utility is a simple portable radio player that lets you tune in to different stations, as well as search for and sort them. We also like the fact that it doesn't add its own stream, meaning it's not laden with ads. Freeware Multimedia Player Description: The newly added Freeware Multimedia Player is a lightweight software application that helps you play multimedia files, and is easily accessible from the Windows desktop. The interface and features of this application are fairly basic, which makes it a perfect choice for novice users. We liked the fact that it can play just about any type of multimedia file, without the need for prior setup, as well as the ability to select various options, such as display, preferences, output, links, controls, notifications, subtitles and audio (from a built-in volume control). A practical tool that can help you create class diagrams Besides the standard purpose, the Class Layout Creator offers its own features and functionality.
