menu options that you can never remember, and even schedule macros to run unattended using Windows Task Scheduler. · Macro Magic's extensive menu driven tool palette to launch and control programs, access and navigate web sites, automate data entry, access all of those buried menu options that 1d6a3396d6

Macro Magic is a time-saving automation program designed to help you perform repetitive tasks more efficiently, whether you want to turn off your PC, launch a web site, or open your email program. Macro Magic is easy to use. Once you've created a macro, you can either record a keyboard command or use one of the several HotKeys available. You can then assign a HotKey to your macro, so that you can perform the same task a very short time later without having to look at your computer screen. Macro Magic's easy-to-use interface offers several options for program control. You can launch programs, send keystrokes, open web sites, navigate through the Windows GUI, wait for windows to appear, restart your computer, and even schedule your macros to run unattended using Windows Task Scheduler. Macro Magic's full-featured tool palette includes a powerful menu driven Macro Builder, which allows you to create or edit macros quickly, easily, and in a wide variety of ways. The Macro Builder lets you create one-step macros with 1-100 steps, run multiple steps at the same time, send keystrokes, launch programs, rename, copy, move, and delete files, insert delays into your macros, run Windows or existing macros in your list, control existing windows, and access a variety of other functions. Macro Magic includes a number of useful options, including: Macro Saved Options - Store your macros in your personal library, where you can easily access them at any time. Task Scheduler - Send your macros automatically to run at certain times, without you having to manually click Start. Contact Us Norton AntiVirus Premium 2005 Norton AntiVirus Premium 2005 is designed to protect your PC from viruses, spyware, online risks, spam, and other dangers in the network. If you are using internet, you must install this software before surfing.
